

E C O P O D

The First Ever Single Use Zero Plastic Powder Based Amenities

(Patent Pending)

The EcoPod is a revolutionary alternative to traditional single use amenities. As a sustainable solution to plastic packaging and heavy liquid formulations, the EcoPod uses a waterless powder based formula packaged in paper pods made with 60% bamboo fiber, 30% sugarcane, and 10% wood fiber. Shipping such a lightweight powder product also lowers our global carbon footprint.

Easy to use, easy to transport, and even easy to compost, we are pioneering a new road to a *zero plastic* future.

- ✓ 0% Plastic Packaging
- ✓ Waterless Powder Based Formula
- ✓ Fully Compostable
- ✓ Waste Stackable Product
- ✓ Soy-based Ink Printing
- ✓ Lower Carbon Footprint

HOW TO USE

1

Lift lid to open pod. Pour powder contents into hand.

2

Add water to create lather between hands.

3

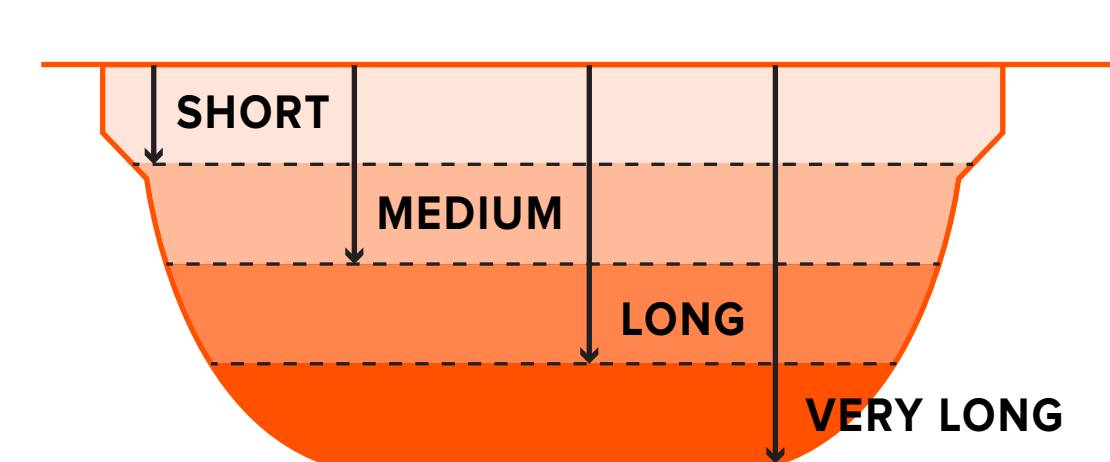

Apply to wet hair or skin and use normally.

4

Rinse thoroughly with water.

HOW MUCH TO USE

Up to 4 Uses Depending on Hair Length

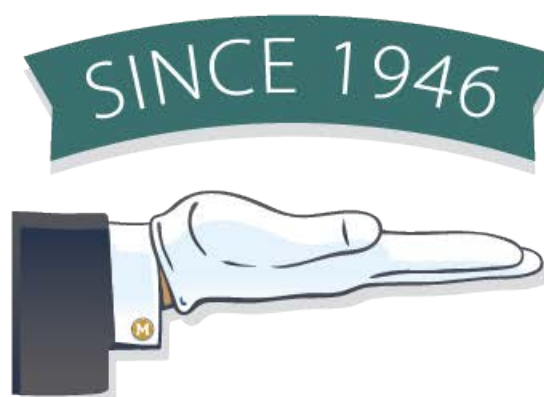

Non-consumable. Do not eat or swallow. If ingested, seek medical attention immediately.

To prevent powder from dissolving before use, handle with dry hands.

A Waterless Powder Based Formula. Just Add Water to Use.
Packaged In Compostable 60% Bamboo Fiber + 30% Sugarcane + 10% Wood Fiber Pod.
